

DataStore is a cloud-based solution that enables you to efficiently report on your Project Online and SharePoint data.

Built on Microsoft Azure and configured with an intuitive user interface, DataStore delivers quicker and easier access to data. Utilize a single reporting hub for all your trend analysis and historical reporting across all projects. Capture and synchronize all Project Online and SharePoint data, including out of the box data, custom lists, and custom columns.

- Maximize existing investments
- No server maintenance
- Intuitive user interface
- Security as standard

What are the benefits of using DataStore?

Automated Data Sync

DataStore gives the flexibility around how your data is synced. With automatic, event-driven syncing always on, you can also have syncs scheduled, on-demand or any combination.

Identify Issues Within Projects

Gain full transparency of issues within your projects and easily build data compliance reports.

Fully Cloud Based

Access all data quickly and securely through the Azure SQL database, enabling efficient, real-time reporting

Enterprise Level Reporting

Providing you with a complete reporting hub, delivering insight on all Project Online data, custom SharePoint data, and current and historic trends.
